

NO-DNC Whitepaper (v1.0)

1. Executive Summary

NO-DNC is a meme-driven Ethereum ERC-20 token created as a satirical response to centralized political influence, insider decision-making, and opaque systems. Built with fairness and transparency, NO-DNC embraces decentralized culture and features a true fair launch and a liquidity-first strategy on Uniswap.

2. Introduction to Meme Coins

Meme coins bring humor, culture, and community energy into the blockchain world. NO-DNC fits this model—fun, satirical, and community-centered—yet structured with real tokenomics and transparency.

3. Purpose & Vision

The goal of NO-DNC is to demonstrate transparency and community empowerment through satire. No insiders, no committees, and no gatekeepers—just smart contracts and an open, decentralized launch process.

4. Tokenomics

Total Supply: 1,000,000,000 NO-DNC

- 30% – Fair Launch Sale (300M)
- 30% – Liquidity Pool (300M)
- 10% – Investors & Founders (100M) – 12-month lock, then 12-month linear vest
- 15% – Marketing & Ecosystem (150M) – 12-month linear vest
- 10% – Community Rewards (100M)
- 05% – Charity (Turning Point USA) (50M) – locked, then quarterly releases

5. Launch & Liquidity Strategy

NO-DNC launches through a PinkSale Fair Launch with no presale and no whitelist. After the sale, trading begins on Uniswap with the liquidity locked to ensure stability and trust.

6. Roadmap

Phase 1: Launch, liquidity lock, community growth.

Phase 2: Influencers, press releases, meme campaigns, CoinGecko/CMC submissions.

Phase 3: Ecosystem expansion, additional listings, community incentives.

7. Governance & Community

NO-DNC is community-powered. There is no formal governance at launch, but the direction evolves based on holder feedback, meme culture, and community participation.

8. Security & Transparency

Built using standard ERC-20 architecture with verified contracts, locked liquidity, and structured vesting.

No mint functions, no hidden owner privileges, and no insider manipulation.

9. Closing Statement

NO-DNC blends satire and decentralization into a transparent, fair, community-driven meme token. No committees. No insiders. No gatekeepers. Only blockchain, culture, and community participation.
